OBJECTIVE

Motivated Cloud Engineering enthusiast with hands-on experience in deploying scalable and secure applications on AWS, including EC2, S3, IAM, Lambda, CloudFront, and CloudWatch. Skilled in cloud architecture design, storage management, monitoring, networking fundamentals, and implementing security best practices using IAM policies and access control mechanisms. Experienced in optimizing application performance and efficiently managing cloud infrastructure in production-like environments. Currently preparing for AWS Solutions Architect certification while actively learning DevOps practices, CI/CD pipelines, and infrastructure automation. Seeking a Cloud Engineering role to build reliable, secure, and high-performing cloud solutions while continuously strengthening expertise in automation and modern cloud technologies.

EDUCATION

Master of Computer Applications JNTU-GV College of Engineering, Vizianagaram	Oct 2024 - Jun 2026 <i>Pursuing</i>
Bachelor's Degree Shri Shirdi Sai Srinivasa Degree College, Vizianagaram	Sep 2021 - Apr 2024 <i>CGPA: 8.6/10.0</i>

PROJECTS

Study Stream / Academic Hub <i>Oct 2025 - Nov 2025</i>	MCA Mini-Project — JNTU-GV
An integrated academic resource management platform developed to centralize scattered learning materials. Built with React.js frontend, Flask backend, and MySQL database. Implemented JWT-based authentication, role-based access control, advanced search with full-text indexing, and secure file upload system. Containerized application using Docker for consistent development and deployment environments. Successfully reduced student search time by 95% and faculty workload by 40%. Tech: Python, Flask, React.js, MySQL, JWT, Docker, AWS S3, REST API, Docker Compose	
Hybrid Cloud Deduplication System with ML-Based Similarity Detection <i>Jan 2026 - Feb 2026</i>	Cloud Security & ML Project
Designed an intelligent hybrid cloud storage system implementing ML-assisted secure deduplication using Decision Tree prediction, SHA-256 hashing, and TF-IDF similarity detection. Integrated Convergent Narrowing Storage (CNS) with AES-256 convergent encryption to ensure unique ciphertext storage and enhanced data security. Extended content intelligence using OCR for image text extraction and Whisper-based speech-to-text processing for multi-format similarity analysis. Deployed hybrid architecture with AWS S3 integration, RBAC security, integrity auditing, and real-time monitoring dashboards for scalable enterprise-grade storage optimization. Tech: Python, Flask, Machine Learning (TF-IDF, Decision Trees), AWS S3, Boto3, Cryptography, OCR, Whisper, SQLAlchemy	

TECHNICAL SKILLS

AWS Services	EC2, S3, Lambda, IAM, CloudFront, CloudWatch, Route 53, RDS
Programming	Python (Flask, Boto3), Java, SQL, JavaScript, HTML5, CSS3,
Web Technologies	React.js, REST API, JWT
Databases	MySQL, RDS
Infrastructure	Version Control, Containerization, CI/CD Pipelines, Monitoring
Concepts	Cloud Security, IAM Policies, Auto-scaling, Load Balancing, Networking

CERTIFICATIONS

Getting Started with AWS - AWS Certification	2024
AWS Solutions Architecture Job Simulation - Forage	Jan 2026
Certificate of Participation - GenAI Hackathon 2025, JNTU-GV College of Engineering	Dec 2025
